

FIP DEVELOPMENT GOALS (DGs) INDICATORS GLOBAL DASHBOARD

WHAT ARE THE FIP DGs?

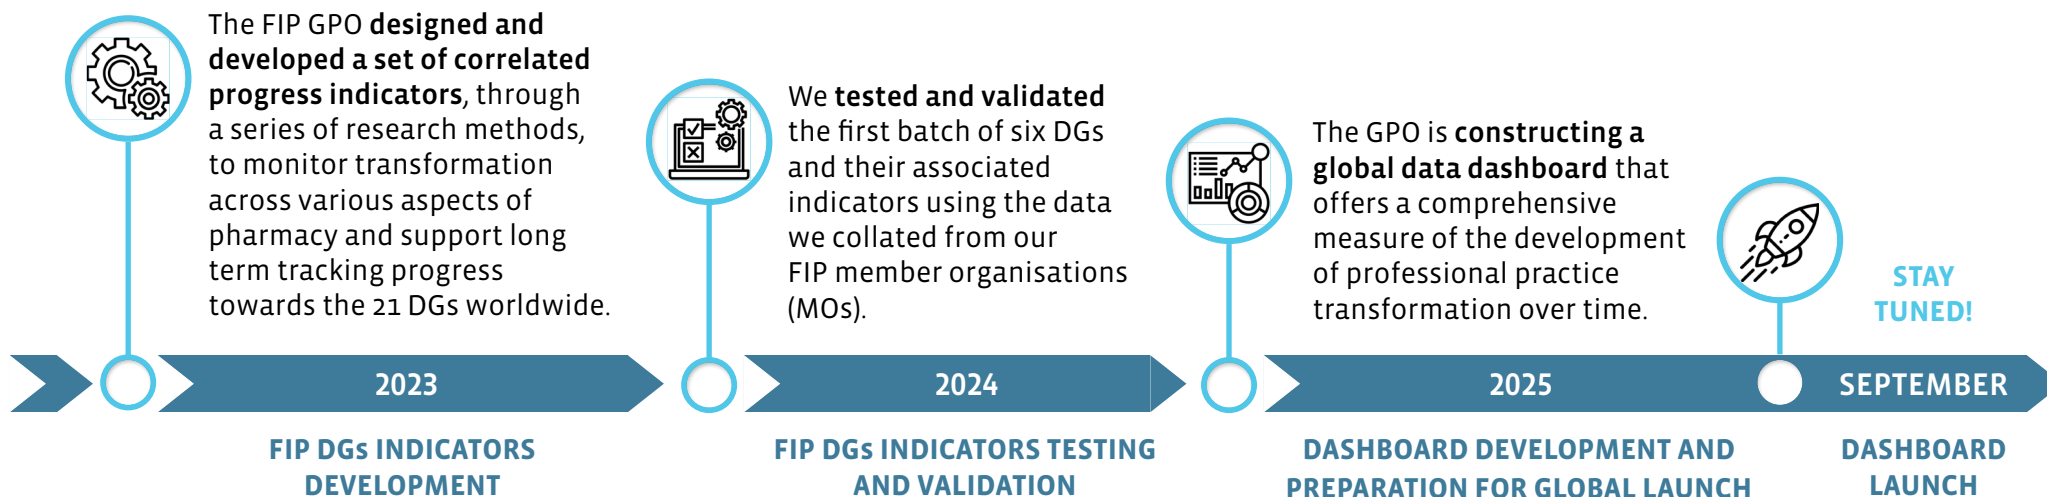

The FIP Development Goals (DGs) provide a global framework for needs assessments and prioritisation for member organisations, serving as a key resource for transforming the pharmacy profession globally, regionally, and nationally over the next decade.

To support the implementation of the FIP Development Goals, a set of **progress indicators** was developed by the FIP Global Pharmaceutical Observatory (GPO).

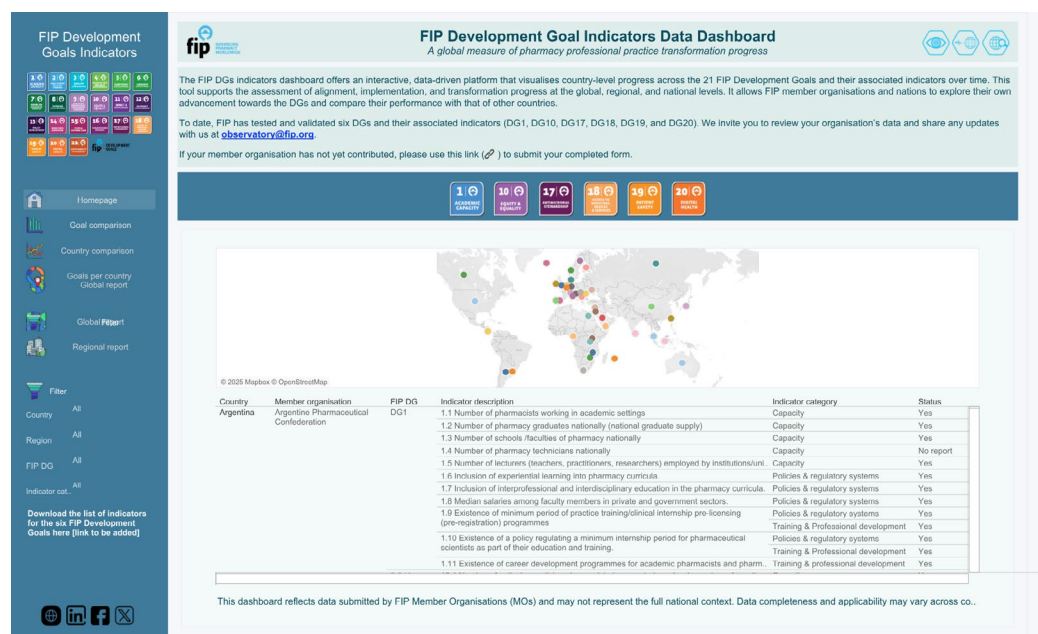

These indicators were designed to monitor advancement and alignment across countries, using data submitted by FIP Member Organisations (MOs).

TIMELINE AND CURRENT PROGRESS

WHAT IS THE DGs INDICATORS DASHBOARD?

A global measure of pharmacy professional practice transformation progress

The **FIP DGs indicators dashboard** offers an interactive, data-driven platform that visualises country-level progress across the 21 FIP Development Goals (DGs) and their associated indicators over time.

This tool supports the **assessment of alignment, implementation, and transformation progress** globally, regionally, and nationally.

It allows FIP member organisations and nations to explore their own advancement towards the DGs and compare their performance with that of other countries.

Your participation will support the sharing of best practices and policies across FIP MOs and contribute to global pharmacy development.

If you have any questions or need support, feel free to contact the GPO team at observatory@fip.org

FIP MOs CAN USE THE DASHBOARD TO:

Identify where improvements are needed

Set priorities for quality improvement and support

Benchmark performance against other countries

Support national quality improvement schemes

Demonstrate the progress that pharmacy is making in support of health systems outcomes

50 FIP member organisations from 45 countries have contributed to the data used to build the dashboard.

If your organisation has not yet submitted a response, we invite you to do so. Responses should come from the national pharmacy professional association of an FIP MO or a non-FIP MO.

Please scan the QR code or click [HERE](#) to submit your completed form.
