5<sup>th</sup> FIP Pharmaceutical Sciences World Congress (PSWC)

Pharmaceutical Sciences beyond 2020 – The rise of a new era in healthcare

Melbourne, Australia April 13 – 16, 2014

MESSAGE FROM THE VICTORIAN MINISTER FOR TECHNOLOGY

## FIFTH PHARMACEUTICAL SCIENCES WORLD CONGRESS 2014 - 13 TO 16 APRIL

Welcome to Melbourne and the fifth Pharmaceutical Sciences World Congress 2014.

We are delighted to have secured this world-renowned congress for Melbourne and to welcome many of the world's leading pharmaceutical scientists, researchers and organisations, representing 15 countries.

Over the past 15 years, the Victorian Government has committed \$1.8 billion to the life sciences sector.

Victoria has emerged as a leading global destination for life sciences, home to such breakthroughs as the first cervical cancer vaccine and discoveries such as colony stimulating factors and rotavirus.

Victoria has a strong record of commercialising our research, with Melbourne now home to 160 biotech and pharma companies including CSL Ltd, and regional headquarters for major multinationals such as GlaxoSmithKline.

Melbourne is also one of only three cities in the world to have two universities – the University of Melbourne and Monash University – in the top 20 biomedicine rankings, along with 13 dedicated life sciences institutes that attract more than 40 per cent of Australia's medical research funding.

The Victorian Government is proud to be a supporter of this congress. I wish you all a very productive and enjoyable time.

Minister for Technology

### **WELCOME TO MELBOURNE!**

To our Global Colleagues in the Pharmaceutical Sciences, on behalf of the International Pharmaceutical Federation (FIP) Board of Pharmaceutical Sciences, we are pleased to welcome you to the 5<sup>th</sup> Pharmaceutical Sciences World Congress (PSWC) here in Melbourne!

Gathering the world's leading scientists and researchers, the PSWC 2014 will extend its world-renowned reputation for providing a forum to discuss the latest scientific discoveries driving the pharmaceutical sciences world-wide, focused on the theme of 'Pharmaceutical sciences – The rise of a new era in healthcare': Breakthrough technologies and treatments, emerging markets, the power of the information age and societal needs and demands will guide session topics and be complemented by debates, posters and many opportunities to network and share with fellow scientists, researchers, industry representatives and students.

FIP, the PSWC 2014 Programme Committee and the Local Organising Committee in Melbourne wish for you to experience an event that equals previous PSWCs in scope and opportunities for advancing the pharmaceutical sciences on a global level.

Welcome to the PSWC 2014!

### **PSWC EDUCATION FORUM**

### **SATURDAY 12 APRIL**

12.00 - 13.00

#### **NETWORKING LUNCH FOR ALL PARTICIPANTS**

13.00 - 17.00

#### **PSWC EDUCATION DAY**

One half day of education activities at PSWC specially designed for PhD students and other groups that are involved in pharmaceutical education in the broadest sense of the word. There will be a big student symposium and a smaller invitation-only workshop involving key figures in pharmaceutical education from both the science and practice areas.

Participants of both sessions will lunch together so they can take full advantage of networking opportunities. Monash University has generously agreed to provide its outstanding educational facilities for these activities.

#### STUDENT SYMPOSIUM

The PSWC 2014 meeting aims to foster professional development of young pharmaceutical scientists. In keeping with this ethos, this student focussed symposium will provide an opportunity for direct engagement with key pharmaceutical science leaders. Held at the Monash University Parkville Campus (a short tram ride from the city), this free symposium is centred around the theme "a vision for young pharmaceutical scientists". Topics have been chosen to provide future perspectives on wide ranging areas from when to publish or patent to how to use global networks effectively. Speakers will include leading pharmaceutical scientists as well as leaders of professional bodies such as FIP, AAPS and EUFEPS. This symposium also provides a fantastic opportunity for students to meet these eminent pharmaceutical scientists and educators at complimentary networking functions.

#### CHAIR

Christopher Porter (Monash University, Australia)
Orlagh Feeney (Monash University, Australia)
Sifei Han (Monash University, Australia)

#### **SPEAKERS**

Michel Buchmann (President, FIP)
Henri Manasse (American Society of
Health-System Pharmacists)
Marilyn Morris (President, AAPS)
Meindert Danhof (President, EUFEPS)
Cameron Smith (FB Rice, Australia)
Colin Pouton (Monash University, Australia)
Nigel Bunnett (Monash University, Australia)

#### **TOPICS INCLUDE:**

- FIPEd: What is it and what is it doing?
- The importance of global professional networks
- Successfully patenting innovation while maintaining a competitive publication record
- Biologicals versus small molecules in 2020
- · Big data; the virtual frontier of medical research

Monash Institute of Pharmaceutical Sciences Monash University (Parkville Campus) 381 Royal Parade, Parkville Victoria 3052, Australia

### **SUNDAY 13 APRIL**

4 optional pre-conference workshops to be delivered by Monash University faculty members and invited speakers will provide deep insights into the following topical areas (Separate registration is required).

#### \$200,00 AUD per Workshop

PSWC WORKSHOP 1: BIOSIMILAR MONOCLONAL ANTIBODIES

9.00 - 12.30

#### LOCATION: Meeting Room 207

#### PROGRAMME

This workshop will be delivered by Anita O'Connor (USA). In June 2013, the European Medicines AMA's Committee for Medicinal Products for Human Use (CHMP) recommended two infliximab containing monoclonal antibody biosimilar preparations. These positive recommendations included extrapolation to indications for which clinical studies have not yet been conducted with the biosimilar product but rather based on the indications approved for the reference monoclonal antibody. Patent expirations for a number of other high market monoclonal antibody therapeutics are also imminent. This workshop will examine the emerging regulatory framework around this important class of biosimilars and examine clinical, analytical and market frameworks for their introduction.

### PSWC WORKSHOP 2: CHALLENGES OF POORLY WATER SOLUBLE DRUGS

9.00 - 12.30

#### LOCATION: Meeting Room 208

### PROGRAMME

9.00 - 9.15	Introduction Christopher Porter (Australia)
9.15 – 9.50	Solid dispersions as a means to enhance solubility and exposure <b>Duncan Craig</b> (UK)
