

## Special Interest Group (SIG) Drug Delivery and Manufacturing

- Prof. Tetsuya Ozeki participated in the BPS conference and One FIP conference held in The Hague in April.
- Prof. Tetsuya Ozeki did the abstract reviewing for the relevant Section of the FIP Brisbane Congress in September.
- Prof. Tetsuya Ozeki chaired the SIG DDM session and served as a judge for the SIG DDM poster session presentation at the FIP Brisbane Congress.
- Pediatric Formulations Focus Group (PFFG) survey identified the global challenges facing pediatric oral extemporaneous compounding as well as the needs and most compounded medicines. The findings have been drafted into a manuscript which will be submitted in Q2 of 2024.

### Goals in 2024:

- **Goal #1:**  
The DDM leadership team engage more effectively with colleagues from various BPP Sections in joint programming activities to underline invaluable relationship between clinical and practical outcomes and scientifically designed drug delivery and manufacturing.
- **Goal #2:**  
To disseminate knowledge and facilitate networking between drug delivery and manufacturing professionals worldwide through webinars, opinion papers or reports
- **Goal #3:**  
To complete oral extemporaneous compounding training videos that will enable pharmacists to keep abreast of latest compounding practices.
