IN CONCLUSION:

- **In modern community pharmacy practice one is expected to be competent in:**
 - pharmaceutical care;
 - professional ethics, psychology, communication, public health /health promotion;
 - economics, financial affairs, book keeping, economic planning and management, economics of drug use (pharmaco-economics), supply chain management;
 - quality assurance and management;
 - ICT and eHealth.
- **We are learning to work with new technology such as apps;**
- **Commitment to change and competence of pharmacists is crucial.**
