

# QUALITY ASSURANCE AND ACCREDITATION

Dr MD Karvekar

PHARMACY EDUCATION

PHARMACY COUNCIL OF INDIA, India

Global Conference on  
Pharmacy &  
Pharmaceutical Sciences  
Nanjing  
China  
7-8 November 2016

- Pharmacy education in India is at crossroads with the increasing number of pharmacy institutions and decreasing number of students aspiring to take pharmacy as a career. One of the reasons for the same is an apparent perception of decreasing quality in Pharmacy education.

Global Conference on  
Pharmacy &  
Pharmaceutical Sciences  
Nanjing  
China  
7-8 November 2016

- The Pharmacy Council of India (PCI), established the National Task Force for Quality Assurance in Pharmacy Education. This initiative is dedicated to three domains of action: quality assurance, academic and institutional capacity, and competency and vision for pharmacy education and profession.

- The FIP Quality Assurance framework document served as a basis for initiating discussions, factoring various requirements for standards and also to develop a quality framework for the council to be able to assure the quality of pharmacy education and practice of Pharmacy profession in India

- FIPed should perhaps establish a consortium of Quality Assurance Agencies so that the experiences can be shared and help understanding the Pharmacy education and explore the possibility sharing resources not only of the FIP but also that of the member countries. This would also help foster uniform advancement of pharmacy education globally

THANK YOU
